

*Work comfortably...*

Electric Height Adjustable Desk

TECHMOVE*just the way you like!*

SITTING...

We have got used to sedentary desk work. If a new chair, a footstool or readjustment of the screen have not helped and you still experience some discomfort, adjust the height of the desk to your own height and finally feel relieved.

OR...

Do you spend a lot of time sitting at a desk, the height of which is not tailored to your own height?

No time to take care of your spine?

Do you feel that taking breaks to stretch your legs is a waste of time?

Do you know how to unburden your spine every day, without even leaving your desk?

STANDING?

The introduction of sitting-standing mode of working not only optimizes the comfort at work, improves concentration and productivity, but first of all it reduces the risk of musculoskeletal disorders, heart and blood vessel diseases.

INFINITELY VARIABLE DESK HEIGHT...

The reliable **LINAK**  actuators implemented in our desks ensure a smooth, quiet and precise desk height regulation between 70 and 120 cm.

Low or high, sitting or standing – now you can adjust the height of your desk to the type of work you are performing, exactly the way you like!

With the **TECHMOVE** desk, you can take care of your spine in two steps!

1.
by precisely adjusting
the height of the desk
to your own height

2.
by changing positions
from sitting to standing,
thanks to which you
can relax your back

... WITHOUT ANY EFFORT

Forget the cranks, the gas springs, the necessity to remove all the equipment from the desk, or asking others for help.

The height regulation in **TECHMOVE** desks is child's play – you can perform it either with an advanced keypad, or using your smartphone. Besides the modern shape, our desks are characterized by the stability of the entire construction.

TYPES OF HEIGHT-REGULATION

DPG keypad

ensures simple and intuitive handling. Fitted with basic functions – the height adjustment is activated by pushing the keypad up- or downwards.

DPG keypad with a reminder function

has the option of saving up to 4 positions and a function of light signal reminding about the necessity to change the position. The integrated Bluetooth® connectivity allows for the use of a free Desk Control app, which makes it possible to keep track of the personal statistics as well as to receive notifications concerning the necessity to change the position.
