

**MANUFACTURER
OF METAL PRODUCTS**

ABOUT US

Techmark is a leading manufacturer of metal furniture and structures on the Polish market. Our business started in 1990. For the last three decades we have been mastering our know-how and expanding our experience, thanks to which today we are a reliable business partner both in Poland and abroad.

In 2000 we were granted ISO 9001 certificate. We take much effort to guarantee highest quality of our products, as a result of which our products have been awarded certificates of conformity with the Polish standards and hygienic approvals required by law. In 2013 we decided to implement modern IT solutions, thanks to which our business processes have been greatly automated.

Our business is driven by innovative technologies we continue to apply and new projects, including the ones implemented thanks to EU funding, we successfully accomplish. Between 2012 and 2017 we invested almost PLN 18 million in building our state-of-the-art machine park.

OUR OFFER INCLUDES

SALE OF READY-MADE METAL PRODUCTS

Our regular offer covers more than 300 types of metal furniture, which is suitable for nursery-schools, schools and other education-related bodies, as well as company seats, offices, authority departments, banks, hotels and other public facilities, workshops, production floors and service halls. Apart from this, we also manufacture a number of non-standard products, which use automatics and latest IT solutions, such as parcel lockers, slot machines, etc.

PROTOTYPE DEVELOPMENT, NEW PRODUCTS MANUFACTURE AND TECHNOLOGICAL SOLUTIONS IMPLEMENTATION.

We are open to new ideas. Therefore we continuously seek innovative solutions and implement new, custom-made projects, which meet our Client's expectations and follow the latest trends.

METALWORKING

We are able to provide wide range of services related with METALWORKING, which include processes used during production of metal furniture:

- POWDER COATING
- SHEET METAL CUTTING, BENDING AND WELDING
- UV PRINTING

QUALITY COMES FIRST

Over 60.000 pieces of furniture is manufactured in our plant each year. Still we are ready for further production growth. We have suitable production facilities and machine park, as well as we work with experienced team of professionals.

Today it comprises machines manufactured by the most recognised companies, like Salvagnini, Itw Gema, Trumpf, Göteneds or Amada, which gives us the highest precision and quality of the products we manufacture. Among others our machine park includes:

- CO2 laser cutters, as well as 2D and 3D fibre lasers
- automatic sheet metal processing machines
- flanging machines and bending brakes for materials of different thickness and size
- powder paint shop
- other machines used in production processes (e.g. large-format UV printer suitable to provide prints on metal sheets and other materials)

EXPORT

Since 2001 our products have been exported not only to the European countries, but also outside Europe. Today export share reaches at least 30% of our sale and tends to continuously grow.

Today this is one of the key development areas. At the same time we take great pride in the fact, that the quality of our products has been recognised also on the foreign markets. Further expansion on the European markets is our main business aim.

RFID FURNITURE WITH ACCESS CONTROL

We manufacture high-quality furniture provided with RFID technology. Apart from safe storage, RFID furniture with access control can be used for registering and recording events, remote control, etc.

Presented furniture is perfect to be used, where valuable property or data need to be secured or where access to the aforementioned items and assets need to be restricted only to authorised persons. It is mainly used in modern business offices, authority offices, archives, health care facilities, production plants, warehouses, civil engineering, etc.

RFID technology is also used in the:

- office cabinets
- clothing lockers
- compartment lockers
- workshop cabinets

Apart from this, RFID system can be used in any customised furniture. RFID cabinets can be provided with functions such as employee's clock card registration (cabinets with access control), as well as management and register of the company's property (cabinets with insight). RFID technology is reliable, guarantees safe storage and provides complete twenty-four-hour control, with no need to use keys.

We are able to manufacture products not on our permanent offer, and to advise our customers of the best possible solution. Colourful visualisation of the cabinets is presented on our customers' demand free of charge.

WORKSHOP CABINETS

We manufacture high quality workshop cabinets, which need to be placed in all workshops and other facilities, where industrial tools are used for assembly and repair of different items (e.g. in service points, woodworking shops, production halls). They are also commonly used in control points.

Presented furniture is used in service stations, iron-working workshops, garages, warehouses and production halls. Metal workshop cabinets help to keep the working place clean and tidy. They are durable and resistant to mechanical damage. Therefore their content is always safe.

We manufacture:

- light and heavy workbenches
- workshop carts
- high and low cabinets
- cabinets for industrial computers
- racks
- metal boxes
- PSO containers for waste segregation
- other items

Furniture can be configured as needed using wide range of additional elements (such as shelves, containers, compartments, mounts, hooks, etc.), thanks to which each workplace can be customised and designed as comfortable as possible.

Special workshop furniture is designed and manufactured on order, allowing for technical instructions, ergonomics and functionalities of the workplace. We can easily adapt it to your every specific need.

OFFICE CABINETS

The highest quality standards applicable during all manufacturing steps make our metal furniture perfect for use in the business and authority offices, legal offices, archives, as well as reception desks, secretary's offices and other rooms, where personal files or books are kept. Presented furniture is available in different versions, sizes and equipment, which make it very functional and ergonomic.
