SELF-SERVICE STATIONS AND BOOK INLETS

Discover the New Standard of access to Literature.

Innovative devices enabling 24/7 access to books. Reading is becoming more accessible and convenient than ever before.

THE FUTURE OF YOUR LIBRARY

Are you looking for furniture that will keep your library collections safe and tidy? Do you want to modernize your library and increase its attractiveness to readers? Get to know the offer of Techmark - the leader in metal furniture production in Poland.

MODERN SELF-SERVICE STATIONS AND BOOK INLETS

Library cabinets made of high-quality steel are functional and solid furniture that will help keep the library tidy. They are available in various colors and patterns, which allows you to match them to the decor of the room.

The offer of cabinets for libraries and reading rooms is complemented by the so-called library trezors, commonly known as book slots. Drop boxes enable the safe return of books outside library opening hours. Both services are available 24 hours a day, 7 days a week.

Using an easy-to-use drop box, books land safely in a wardrobe drawer. The wardrobe door is secured by a key or combination lock.

Book lockers are modern devices that facilitate reader service. The cabinets allow you to borrow and return books without having to contact library staff.

Do you want to increase the effectiveness and efficiency of your library? Do you want to track the movement and status of your library collections? Want to provide a quick and easy reader experience? Get to know the offer of Techcode - a manufacturer of intelligent furniture with RFID technology.

TECHCODE RFID BOOK LOCKERS AND TREZORS

TECHCODE RFID furniture is the future of libraries. Thanks to it, you can modernize your library and increase its attractiveness to readers. TECHCODE RFID furniture also saves time and money because it reduces the need for human work and prevents loss and damage to books.

TECHCODE RFID furniture enables:
- automatic inventory of library collections,
- quick location of the books you are looking for,
- checking the condition and quality of books,
- monitoring the movement and circulation of books,
- contactless borrowing and return of books,
- statistics and analysis of data about collections and readers.

YOUR BOOKS, YOUR CONTROL, YOUR CONVENIENCE
