FIRE STATION LOCKERS

Techmark fire station lockers are modern and functional solutions designed to meet the everyday needs of fire departments.

They provide quick access to equipment, secure storage, and durability in demanding conditions.

The lockers enable ergonomic storage of specialized clothing, helmets, boots, safety equipment, and personal items.

High-quality workmanship, resistance to mechanical damage, and modern design make them an indispensable part of every fire station's facilities.

The new line of firehouse lockers combines reliability, functionality, and aesthetics—everything you need to keep things tidy and ready for action in any situation.

The possibility of customizing solutions – from color to internal layout – makes Techmark cabinets a perfect fit for both small volunteer fire departments and large state fire departments.

key lock

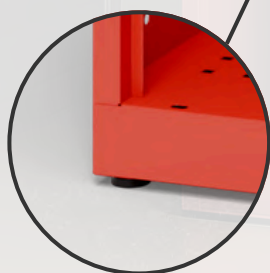

locker for clothes
and personal items
with internal shelves
or a rail with hangers

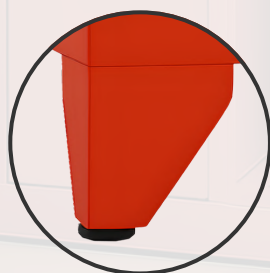

optional
combination lock

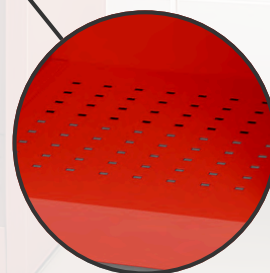

levelling feet

optional 100mm
stands

perforation on the
floor of the cabinet

NEW MODELS

The new series of fire station lockers has been designed for even greater functionality and flexibility of use in professional and volunteer fire departments.

The collection includes five models that differ in design, door layout, and shelf arrangement, allowing users to choose the perfect solution for their specific needs.

Each of the new lockers offers well-designed storage areas – for turnout gear, personal items, and specialized equipment. Fittment with ergonomic clothes hangers, shelves at the right height, and lockers for personal items facilitates organization and speeds up preparation for action.

The design also ensures optimal ventilation, allowing moisture to be wicked away from protective clothing.

The entire unit is made of high-quality powder-coated steel, ensuring durability, aesthetics, and resistance to intensive use in harsh conditions.

STR 1001

three-column cabinet for two firefighters with an upper shelf and lockable compartments with a drop slot and internal shelves

height: 1800 mm
width: 1187 mm

SUPPLEMENTARY LINEUP

Techmark is an experienced manufacturer of metal furniture, offering a full range of solutions designed for professional workspaces.

Our furniture is created in response to the diverse needs of users – from administrative and office areas, through social and storage rooms, to technical and service facilities.

Each product is characterized by a solid construction, resistance to intensive use, and the ability to adapt to specific functional and spatial requirements.

High-quality steel, precise workmanship, and modern technologies, such as powder coating and locking systems, ensure durability, safety, and ease of use for many years.

The wide range of lockers for firefighters' combat and personal clothing is complemented by matching office furniture, benches, and workshop trolleys, which support work organization and increase user comfort.

Our furniture provides comprehensive equipment for modern service and technical workstations.

BENCHES

OFFICE CABINETS

WORKSHOP CARTS

Furniture that supports daily work organization and order in the workplace includes benches, workshop carts, and filing cabinets.

Techmark benches are durable and functional equipment for social areas, changing rooms, and shared spaces. The steel construction ensures comfort and safety in everyday use. The seats are made of moisture-resistant and easy-to-clean materials, making them a practical solution even in demanding operating conditions.

Techmark office cabinets have been designed with ergonomics and document safety in mind. Adjustable shelves make the interior easily adaptable to various formats of files, folders, and binders, while solid locks protect against unauthorized access.

Techmark workshop carts are an indispensable part of technical facilities, enabling organization of tools and accessories. Each cart is equipped with telescopic guides that ensure smooth drawer extension, as well as swivel casters with locks for stability and full control of movement.
